

ART

*"Art Pepper was not only one of the leading saxophonists in the era following Charlie Parker but also a truly illustrious character. His music was filled with the lust for love and life, and already in his lifetime, he was frenetically named a genius, only to be awarded this status for good after his death."*

With this loudspeaker we have concentrated all our skill and experience on just one small point. Well, to be more exactly: On just one small body! As usual with us, the word cutbacks, we do not know! All that fine details; the stiff multi layered body, the sandwich front with it's rigid hand polished Corian®, the Cardas internal wire, the fine crossover parts built and mounted in Germany...

All serves just one high target! The most involving music reproduction! ART is an exquisite little thing with the heart of a giant. Just take a listen and you will see.
