SNOW WHITE

PLUM

STANDARD VENEERS

The austrian walnut is our most beloved veneer!

It is carefully selected and matched, the thickness is higher than commonly used for this purpose.

The finish is in matte or, for extra charge, in hand-polished gloss.

Please hold in mind: Wood is a natural thing and each veneer is unique as a fingerprint!

SPECIAL VENEERS

Of course you can individualize your loudspeaker!

Almost any veneer, colour or finish is possible!

Except exotic woods, and other environmentally unsustainable materials.

Don't hesitate to ask if you you want something just right for you!
Above some excamples.
